ACCELERATING GROWTH AND REDUCING COMPLEXITY

Do you question the accuracy of your inventory? Are you confronted with changing supply chain requirements and compliance regulations? P4 Warehouse Management System addresses these common challenges and creates a real-time warehouse environment that you can trust.

Inventory Control and Management

P4W enhances inventory management by decreasing inventory levels, improving order fulfillment, and reducing order cycle time. Designed to control all of your warehouse's activities, P4W allows you to track every unit down to the lowest level of detail for improved order fulfillment and inventory accuracy.

P4 Warehouse solution makes inventory management a much faster, easier and efficient task. With information that is updated in real-time, P4 Warehouse Management Systems provide quick, accurate feedback so companies can respond faster to the demands of their customers. Distributors and wholesalers know exactly what is in the warehouse, where it is located, and when it needs to be replenished at all times.

Customer Service and Tracking

Your warehouse is an important part of your customers' buying experience. Making sure products ordered are in stock and customers get what they purchased and on time is crucial to providing good customer service. P4W improves picking accuracy so orders are correct the first time.

P4W also makes organizing and tracking shipments easier through automation. Worker assignments, shipment routes and receiving are all easily managed and tracked. This warehouse automation, up-to-date information and real-time tracking all leads to better accuracy and happier customers.

ERP Integration

P4 Warehouse Management System will integrate with your SAP B1 business management system so you don't have to replicate systems or procedures.
